1 About this guide

This guide explains how the East Forsyth Blue Regiment Band website is laid out and how to keep its content up to date through the Content Management System (CMS). It is written for the **content administrator**, the person who manages pages, photos, the calendar, sponsors and forms day to day. You do not need any coding tools. Everything in this guide is done in a web browser at **efhsband.org/admin**.

Who	Looks after
Content administrator (you)	Words, photos, calendar events, sponsors, staff listings, forms, social links and editor accounts, all through the CMS.
Trevor Olsen, site host	The domain, Cloudflare hosting, the database, GitHub code, deploys, email and payment connections, and anything that needs a code change.

GOOD TO KNOW

This guide matches the website as of **October 2026** (the release with the grouped CMS menu, Fundraiser cards manager, visual page editor, and one-year HSTS). The CMS shows each person only the tools their account allows. If a button in this guide is missing for you, see **Section 4** (accounts and permissions).

Conventions: menu items and buttons appear in **bold**, exactly as they are labeled on screen. “Menu → Item” means click the item in the CMS left-hand menu. On a phone, tap **Menu** at the top of the CMS to open the same list.

DOCUMENT INFORMATION

Document	East Forsyth Blue Regiment Band, Website & CMS Guide. Replaces the September 7, 2026 Super Admin guide.
Version / date	Version 2.2, October 2026. Matches live CMS screens: grouped sidebar, Fundraiser cards, content vs layout permissions, and the host appendix as of this release.
Prepared by	Trevor Olsen, site host
Next review	After any release that changes CMS screens, or by the start of the next school year.

2 Site map

The public site has one main menu and several pages that are reached only from buttons and links. The dedicated **Coming Soon**, **Join the Band**, and **Volunteer** pages stay on as Coming Soon placeholders (both school logos, left out of the main menu). Other unpublished pages (Active unchecked) return the branded 404 unless a logged-in editor who can edit that page opens them for preview.

Page	Address	Purpose	Status / where it appears
Home	/	Front door: hero, next fundraiser, calendar highlights, booster officers, sponsor thanks, photo gallery, Join and Support buttons.	Live · main menu
Calendar	/calendar.html	Public schedule (Rundown, Month and Week views) plus the calendar email signup.	Live · main menu
Gallery	/gallery.html	All gallery photos. Visitors click a photo to open a larger viewer.	Live · main menu
Contact	/contact.html	School information and the topic-based contact form.	Live · main menu
Directors & Staff	/directors.html	Directory of band directors and staff.	Live · main menu
Boosters	/boosters.html	Booster intro, meetings (from the Schedule Board), officer directory and the optional Pay dues card.	Live · under **Support the Band**
Fundraising	/fundraising.html	Fundraiser cards, Donate and the fundraising email signup.	Live · under **Support the Band**
Sponsors	/sponsors.html	Sponsor directory, sponsor/in-kind choices and Donate.	Live · under **Support the Band**
Become a Sponsor	/become-a-sponsor.html	Bronze, Silver and Gold packages with online payment.	Live · not in menu (footer and Sponsors page)
In-Kind Donation	/in-kind.html	Form for donated goods and services.	Live · not in menu
Letterman Jacket Order Form	/letterman-jacket.html	Built-in order form.	Live · not in menu
Join the Band	/join.html	Information for new families. Edited with the visual page editor.	Live · not in menu (Home Join buttons)
Volunteer	/volunteer.html	Volunteer placeholder page.	Coming Soon style · not in menu
Coming Soon	/coming-soon.html	General placeholder page.	Not in menu
Ensembles	/ensembles.html	Program groups (concert, marching, etc.).	**Inactive** — branded 404 until turned on

Page	Address	Purpose	Status / where it appears
Student Resources	/resources.html	Family and student resources.	**Inactive** — branded 404 until turned on. The “Student Resources” top link currently points to the school district’s counselor page instead.
Maintenance page	/maintenance.html	“We’ll be right back” page shown while maintenance mode is on.	Only during maintenance

What fills in automatically

Several parts of the site are built from other CMS tools, so you change them at the source and not on the page itself:

You see this on the site	Change it here
Home “next fundraiser” and Fundraising page cards	Menu → **Fundraising** → **Fundraiser cards** (Section 6.4). Only **Approve**d cards appear on the public site.
Home calendar list, Calendar page, red IMPORTANT banner	**Schedule Board**
Boosters meetings card	**Schedule Board** events with What = **Meetings**
Booster officers (Home and Boosters page)	Menu → **Band Boosters** → **Booster Members**
Sponsor logo marquee, Home sponsor thanks, fly-in ad	Menu → **Sponsors** → **Manage sponsors**
Home sponsor packages	Menu → **Sponsors** → **Become a Sponsor** (package cards)
Home and Gallery photos	Menu → **Photos**
Hero headline, site title, footer note, top links	Menu → **Site Settings**

3 Header, menu and footer

Every public page shares the same frame. From top to bottom:

Part	What it shows	Edited in
Top link bar (dark strip)	Up to six short links (now: Upcoming Events, Student Resources, Contact) and **Login**. A signed-in user sees **Staff Menu** instead of Login.	Site Settings → **Top utility links**
Header	The East Forsyth HS eagle logo, the site title (“East Forsyth Blue Regiment Band”) and the round Blue Regiment mark.	Site Settings (title). Keep both logos as they are.
Main menu	Home, Calendar, Gallery, Contact, Directors & Staff, then a **Support the Band** drop-down (Boosters, Fundraising, Sponsors). After the links: the bell (**Notify Me**, calendar push alerts) and an Add to Home Screen button on supported phones. On phones the menu opens from the three-line Menu button.	Built from the active pages in navigation order (Pages → Page settings → Navigation order).
Donate button (gold)	Opens the donation form (Fundraising).	Fixed
Sponsor marquee	Scrolling sponsor logos on Home, Calendar, Fundraising, Sponsors and the Coming Soon pages.	Manage sponsors
IMPORTANT banner (red)	Appears under the header on every page in the 7 days before an IMPORTANT event (Section 6.3).	Schedule Board
Footer	Social icons, site title, footer note, a fixed school-imagery credit line, and three link columns: **Program** and **Families** (filled automatically from the first active pages in menu order), and **Community** (Sponsors, Sponsor/In-Kind, Contact, EFHS Website).	Social Media (icons); Site Settings (title, footer note)
Home bottom bar	On Home only: **Join the Band** and **Support the Band** buttons.	Fixed

> **TIP**
> Changing a page’s **Navigation order** moves it in the main menu *and* can change which links fill the footer’s Program and Families columns.

4 Logging in, accounts and permissions

Logging in

1. Go to **efhsband.org/admin**, or click **Login** in the top link bar.
2. Enter your **Username** (your email address) and **Password**. The eye button shows or hides what you typed. Click **Log in**.
3. You land on the **Dashboard**. Its cards and the left menu show only the tools your account can use. **View Site** opens the public homepage.
4. When you are done, click **Log Out** (bottom of the left menu, or top bar on a phone).

- A sign-in lasts **24 hours**. After that, log in again.
- **Change Password** (bottom of the left menu) asks for your current password and a new one twice. The minimum is 8 characters.
- There is no self-service "forgot password" link. A Super Admin sets a new temporary password for you (see below).

Roles

Role	What it means
Super Admin	Has every tool and permission. Only Super Admins can open the Security Log, download this guide, create or promote other Super Admins, change the Boosters dues setting, turn **Maintenance mode** on or off (Trevor / Super Admin only), and preview the site while maintenance mode is on.
Editor	Sees only the tools given by the permission checkboxes on that account.

SITE POLICY

Only Super Admins manage user accounts and site settings. When you create editor accounts, leave **Manage users** and **Site settings, home text, logo, footer** unchecked. That keeps account changes, the logo, the top links, social connections and maintenance mode with the Super Admin.

Creating or changing an account (Super Admin)

1. Menu → **Admin** → **Users** (the screen is titled **User Management**). Existing accounts are listed under **Team Members** with role, Active/Disabled status, permissions and last login.
2. Click **New user**. Under **Invite New User**, fill in **Email / Username** and **Display name**. Set a temporary password of at least 8 characters. Choose a **Role** (**Editor** or **Super Admin - all permissions**) and keep **Active** checked.
3. Tick the permission groups the person needs (tables below), then click **Send Invite / Save User**.
4. Give the person the temporary password yourself and ask them to use **Change password** after their first login. Saving the account does not send them an email.
5. To reset a password, click **Edit** on the account, type a new password and save. When editing, the password field can be left blank to keep the old one. To stop someone logging in, uncheck **Active**. **Delete** removes the account, and you cannot delete your own.

Permission checkboxes

The Users form groups boxes as **Page layout**, **Content managers**, **Officers & admin**, and **Page access**. Labels below are copied from the form.

Checkbox (as labeled)	What it allows
All pages: layout + Add Page + page settings	Every page in the visual editor (including adding, removing and moving sections), **Add Page**, and ⚙ **Page settings**. Also lets the person approve Fundraiser cards.
Site settings, home text, logo, footer	**Site Settings** (site title, hero text, footer note, logo, top links, error-page copy) and **Social Media**. Does *not* turn Maintenance mode on or off. *Policy: Super Admin only.*
Manage sponsors	**Sponsors → Manage sponsors**: add, edit, reorder and delete sponsors, set tiers and fly-in timing, print the Gold sponsors PDF.
Directors & staff list	**People → Directors & Staff** directory.
Calendar events (own)	Opens **Calendar → Events & Schedule Board** to add, move, edit and delete public calendar events the person created.
Manage all calendar events	Same Schedule Board, for every event.
Booster members	**Band Boosters → Booster Members**.
Meeting Minutes (create/edit, 48h)	Add, upload (.docx) and edit booster minutes for **48 hours from creation**. After that only a Super Admin can edit. Everyone can view and print. Only Super Admins can delete.
Badge Creator	**Band Boosters → Badge Creator**.
Photos	**Photos & Social → Photos**: upload, caption, reorder and delete gallery photos.
Contact form topics	**Messages & Forms → Contact Form**.
Forms	**Messages & Forms → Forms** (Form Builder) and form submissions.
Fundraising manager (future)	Reserved. Fundraiser cards today use the Fundraising page boxes in **Page access** (below).
Treasurer	**Donations ledger** and **Checkout**.
President	Ledger, Checkout, Schedule Board (including **Finished** emails), Badge Creator and Forms.
Vice President	Checkout, Schedule Board (including **Finished**) and Badge Creator. No Ledger.
Send staff email	No extra screen for normal use. **Staff Email** is already open to every logged-in user.
Manage users	**Users** screen. *Policy: Super Admin only.* An editor with this box cannot grant it to others and can only grant permissions they already hold.

Page access lists one row per page, with two boxes:

- **Edit content** — text, photos, links and list items on that page. The person can open the page from **Pages**. Most pages open in the visual editor. Home still uses the older Pages editor. On Fundraising this also opens **Fundraiser cards** so they can add and edit drafts.

- **Change layout** — add, remove or move sections, plus **Add section**, **+ Add hero card** (Fundraising only) and History restore. Ticking layout also ticks content and cannot be unticked until layout is off.

⚙ **Page settings** (title, address, menu, Active) stays under Pages and needs **All pages: layout + Add Page + page settings**.

> **TIP**
> Someone who has *only* calendar permissions sees just the Schedule Board, with no Dashboard. That suits a calendar volunteer.

5 A quick tour of the CMS

The left menu is grouped. On every page load and every route, **all groups start collapsed**. The only exception is the group (and any parent group) that contains the current screen: that group opens, and the current item is highlighted. The CMS does not remember which groups you opened last time. You can still open and close groups during the visit. The search box (**Find a page or tool…**) temporarily expands matches. The CMS hides anything your account cannot use.

Menu area	Items
Top	**Dashboard** (always visible, not in a group)
Website → **Pages**	One shortcut per page you can edit. Click the name to open the visual editor (Home still opens the older editor). Super Admins and all-pages editors also see ⚙ **Page settings**, which currently opens Fundraising page settings (title, address, menu, Active).
Content → **Calendar**	**Events & Schedule Board** · **Important banners**
Content → **Fundraising**	**Fundraiser cards** (a number badge means drafts waiting for approval) · **Donations ledger** · **Checkout**
Content → **Sponsors**	**Manage sponsors** · **Sponsors page** · **Become a Sponsor**
Content → **Band Boosters**	**Booster Members** · **Meeting Minutes** · **Badge Creator**
Content → **People**	**Directors & Staff** · **Ensembles**
Content → **Photos & Social**	**Photos** · **Social Media**
Content → **Messages & Forms**	**Staff Email** · **Contact Form** · **Forms**
Admin	**Users** · **Site Settings** · **Security Log**
Bottom	**Change password** · **Log out**

Super Admins also see a **Website Guide** card on the Dashboard. It opens this PDF, and only Super Admins can download it. A “Saved.” message confirms most saves. Changes publish to the public site right away, though a page can take up to about a minute to refresh for visitors.

6 Editing content

6.1 Pages editor

1. Open **Home** from **Pages**, or open ⚙ **Page settings** (under Pages) if you have all-pages permission. That settings screen is titled **Page settings**.
2. The **Live page preview** looks like the public page. Click any text to edit it. This older editor is still used for **Home** and for title / address / menu / Active settings.
3. Select text, then use the **Formatting** bar: **B**, *I*, U, **Color**, **Size** (Normal, Small, Medium, Large, Extra large), • **List** and **Photo** (insert an image at the cursor, then drag a corner to resize or use Delete photo).
4. An **Unsaved** tag shows you have changes. Click **Save Changes** to publish. If you try to leave with unsaved edits, the CMS offers **Stay**, **Discard** or **Save & leave**.

With **All pages: layout + Add Page + page settings** you also get **Page settings**: Page title, Slug, Path, Navigation order, Page layout, **Active / visible on the public site**, **Add callout**, and the **Add Page** button. Editors with a single page checkbox see only their pages in the list and do not see ⚙ Page settings.

- **To switch a page off** (hide it from the public site and the menu), open **Settings**, uncheck **Active**, and save. Visitors who open that address see the branded 404 unless they are logged in and can edit the page (preview). The dedicated Coming Soon, Join the Band, and Volunteer pages stay as Coming Soon placeholders. Check **Active** again to bring a page back. This is how **Ensembles** will go live.
- **Home page:** the hero headline and top links live in Site Settings. The fundraiser, calendar, sponsor, officer and photo sections fill in automatically (Section 2). Home is not in the visual editor yet.
- Most other pages open in the visual editor (next section). Live lists, calendars, forms, and donate buttons stay locked in place so they keep working on the public site.

6.2 Visual page editor

Click a page name under **Pages** to open the drag-and-drop editor at **/admin/visual/** and that page's address. You need that page's **Edit content** or **Change layout** box, or **All pages: layout + Add Page + page settings**. Home is not in this editor yet.

Phones are blocked. The screen says **"Please edit pages on a computer or tablet."** with **View live page** and **Back to CMS**. Fundraiser cards uses the same gate: **"Please edit fundraiser cards on a computer or tablet."**

A content-only editor (Edit content, no Change layout) can change words, photos and links but cannot add, remove or move sections. Layout tools stay hidden.

A banner reads **"This page is being edited"** and reminds you that visitors still see the published page until you publish. The banner buttons are:

Button	What it does
Add section	Opens **Add a section** and adds a ready-made block: Hero, Hero card, Text, Photo, Button or Dropdown (question and answer). Layout permission required.
+ Add hero card	On **Fundraising** only (with **+ Add callout**). Adds a hero card to that page. Other visual pages do not show this button yet.
Undo / **Redo**	Steps back or forward through your edits.
Width	Previews the page at 1920, 1280, 768, 390 or 320 pixels wide, to check phones and tablets.

Button	What it does
History	Lists recent saves (Draft or Published, with time and name). **It keeps the last 20 saves.** Click one to restore it into the draft.
Save draft	Saves your work without changing the live page.
Publish	After a confirmation, **replaces the live page content** with what is on screen.
Exit	Returns to the CMS. You are warned if you have unsaved changes.

- Click any part of the page to select it. The small toolbar lets you **Select parent**, **Move**, **Copy**, change the **Image**, add a **Link** or **Delete**. Double-click text to edit it.
- Yellow **Live data — locked** blocks (calendar, upcoming events, gallery, sponsors, staff, boosters, forms, contact, donate) cannot be edited. They keep showing live data on the public page.
- Use Width **390** and **320** to scroll the whole page as a phone would see it. Before Save draft or Publish, the editor checks those widths. If something is too wide, it names the element and offers **Publish anyway** / **Go back**.
- **Change image** lets you pick a photo already on the site or **Upload a site photo**. Uploads are added to the site photo library and appear in the public Gallery.
- Links must start with `/` (a page on this site), `https://`, `mailto:`, `tel:` or `#`.
- Restoring an old version puts it in the **draft** only. Click **Publish** to make it live.
- Every save counts toward the 20 kept versions, drafts included. Older versions drop off automatically.

> **IMPORTANT**
> **Publishing replaces the page.** Save a draft first, check every Width, then publish. If something goes wrong, open **History**, restore the last **Published** version and publish it again.

6.3 Calendar: the Schedule Board

The public Calendar, the Home calendar list, the Boosters meetings card and the red IMPORTANT banner all come from Menu → **Calendar** → **Events & Schedule Board** (the screen title is **Schedule Board**).

1. Pick the month and year at the top. The colored track buttons filter what you see.
2. Click **+ New event**, the **+** on a day, or double-click a day. Click once to select an event and double-click it to edit.
3. Fill in **Title**, **Date**, optional **End date**, **All day** or **Start**/**End** times, **What**, **Location** and **Description**. The description can use B, I, U, **Link** (Text to click / Goes to), Color and Size.
4. **Repeat** → **Yes** creates one event for each chosen weekday in the chosen months. Use **Skip date** → **Add exception** for days off.
5. Click **Save**. To move an event, drag it to a new day (on phones, press and hold, then drag). **Delete** asks first, and deleting a meeting also removes it from the Boosters page.

What (track)	Effect on the site
Games · Rehearsals · Trips · Other	Shown on the Calendar. Routine rehearsals are left out of the short Home list.
Meetings	Also listed on the Boosters page meetings card.

What (track)	Effect on the site
IMPORTANT	Tagged IMPORTANT, and shows the **red banner** under the header on every public page from 7 days before the date (or end date) through that day. The text reads "IMPORTANT: *title date*!". If the description has a link, the banner's **Click Here** goes there. Otherwise **View details** opens the Calendar.

Finished (Super Admin, President or Vice President) emails *calendar* email subscribers that the schedule was updated. Use it once after a batch of changes, not after every edit. Saving Schedule Board events does not email anyone by itself.

> **TIP**
> Use IMPORTANT sparingly, for deadlines such as picture day, forms or payments. Every visitor sees the banner on every page for a week.

6.4 Fundraiser cards

Menu → **Fundraising** → **Fundraiser cards** (address `/admin/fundraiser-cards`). The screen title is **Fundraiser cards**. Anyone with Fundraising **Edit content** or **Change layout** (or all-pages) can open it. Drafts stay off the public page until a Super Admin, an all-pages editor, or a Fundraising **Change layout** editor clicks **Approve**.

1. Click **+ Add fundraiser**. Fill in **Title**, **Short description**, **Date**, **Where**, optional start/end times.
2. Under **Card picture** choose **Flyer / image** or **Date tile**. For a flyer: **Replace** or **Choose from Gallery**.
3. Optional labels: **Band members must attend**, **Volunteers needed**, **Custom label**.
4. Set **Main button** (View flyer, Volunteer, View details, Custom link, or None), **Add to calendar**, and **Auto-hide after the date**.
5. Click **Save**. Drag rows in **Cards** to change order. Use **Hide** / **Show** or **Delete** as needed. **Live preview** shows the public card.
6. Approvers also see **Approve** and **Reject**, plus **Check calendar now** and **Fundraiser alert email(s)** → **Save alert emails**.

- A daily job at **7:20 AM Eastern** (`20 11 * * *` UTC) looks at upcoming Schedule Board events about fundraisers (title or description mentions fundraiser/fundraising, mattress, or auction). New matches become drafts. Approvers get email subject **Fundraiser draft needs approval:** plus the title. The link opens the CMS — it is not a one-click approve.
- Rejected events are **not** drafted again unless the calendar date changes. Then a new draft is created and the email says why. Rejected cards sit under **Rejected**.
- If an already-approved card's linked calendar event changes date, time, or location, the card stays as-is and shows a **Calendar changed** flag. Approvers get **Fundraiser calendar changed:** plus the title.
- Only **Approve**d cards appear on Home and the Fundraising page. Hidden and rejected cards do not.
- The Security Log records `fundraiser.card.create`, `.edit`, `.reorder`, `.approve`, `.reject`, `.restore`, `.hide`, `.delete`, and `fundraiser.draft.auto`.

6.5 Sponsors

Menu → **Sponsors** → **Manage sponsors**. Click **Add Sponsor** (or **Edit** on a row), fill in the form and click **Save Sponsor**. Drag rows to change the order and use **Delete** to remove a sponsor.

Sponsor tier	Where the sponsor appears
Bronze — marquee	Site-wide logo marquee
Silver — marquee + fly-in	Marquee and the Home pop-in advert
Gold - Marquee + Fly-in + public advert	Marquee, fly-in and the **Print Gold sponsors PDF** sheet for programs and flyers
Honorable Mention	Marquee (CMS-only thank-you tier; not a paid Become a Sponsor package)

- Fields: Sponsor name, Sponsor tier, street address, City, State, **Logo URL** or **Upload logo**, and Fallback logo text (shown if there is no logo).
- **Honorable Mention stays put on save.** Editing an Honorable Mention sponsor and clicking **Save Sponsor** keeps that tier even if the form would otherwise default to a paid package. Do not "fix" it to Bronze.
- **Show on public Sponsors page** controls only the directory card. The marquee still shows the sponsor.
- **Homepage fly-in timing**: 2 to 30 seconds, then **Save ad timing**.
- Businesses that buy a package on Become a Sponsor are added automatically after payment. Check their logo and details afterwards.
- Page wording: **Sponsors page** (header, intro, callout) and **Become a Sponsor** (click the Bronze, Silver and Gold cards to edit titles, benefits and prices).

6.6 Photos and gallery

1. Menu → **Photos** (titled **Photo gallery**). Click **New photo**.
2. Choose one or more JPG, PNG, WEBP or GIF files. Large photos are resized automatically to under 1.9 MB before upload.
3. Enter **Alt text** (a short description for screen readers, which is required) and an optional **Title / caption**, then click **Upload photo**.
4. Drag rows to change the gallery order. **Edit** changes alt text and caption.

> **IMPORTANT**
> **Delete removes the photo right away, for good.** There is no trash or undo. The CMS refuses to delete a photo still used as a staff or booster photo, sponsor logo or the site logo, but it does *not* check photos placed inside page text (Fundraising, Join). Deleting one of those leaves a broken image.

If Instagram auto-post is switched on (Social Media), each new gallery upload is also posted to Instagram.

6.7 Directors & Staff (and Booster Members)

Menu → **Directors & Staff** → **Add Staff Member**. Enter Name, Role / title, Short description and a photo (**Upload photo** or Photo URL). Keep **Show on Directors & Staff page** checked, then click **Save Staff Member**. A Live Preview shows the result. Drag rows to reorder, or use **Edit** / **Delete**. **Edit page text** changes the page heading and intro.

Band Boosters → Booster Members works the same way for booster officers (**Add Booster Member**, **Show on Boosters page**, **Edit Boosters page**). These people also appear on Home.

6.8 Forms and submissions

Menu → **Forms** opens the **Form Builder**. Super Admins, the President, users with the Forms permission, and anyone a Super Admin adds under **Who can use Form Builder** can use it.

1. Under **Create a form**, type a **Form title** and click **Create form**. The title becomes the public page address (for example Band Trip Form → /band-trip-form.html).
2. Click items under **Add Form Element** (Heading, Short Text, Long Text, Email, Phone, Number, Date Picker, Dropdown, Single Choice, Multiple Choice, Paragraph, Price List). A form can have up to 40 fields. Drag fields to reorder them, and select one to edit it under **Properties**.
3. Under **Email this form to**, pick who receives the completed PDF. Click **Save form**, then **Open page** to check it.

- **Your forms** lists each form with **Edit** and **Delete**. Delete also removes its public page, and cannot be undone. The built-in Letterman Jacket Order Form is listed here too.
- **Email in-kind PDFs to** sets who receives In-Kind Donation forms. Click **Save access settings**.
- **Recent submissions** lists the latest entries with **Download PDF**, and shows **Emailed** or **Not emailed** for each.

6.9 Contact form

Menu → **Contact Form**. Click **Add Topic**, enter a **Topic label**, keep **Active on contact form** checked, choose one or more CMS users under **Deliver messages to**, then click **Save Topic**. Only active topics with at least one recipient appear on the public form. **Recent Messages** keeps every inquiry, even if email delivery fails.

6.10 Email subscribers

- Visitors sign up on the Calendar page ("Email calendar updates") and the Fundraising page ("Email fundraising updates"). The short address **efhsband.org/subscribe** opens the Calendar signup.
- Emails go out only when you choose: **Finished** on the Schedule Board (calendar subscribers) or saving the Fundraising page with **Notify email list** checked (fundraising subscribers).
- People unsubscribe with the link in the email or by replying **STOP**.
- The CMS has no screen that lists subscribers. Ask the site host if you need a count or an export.

6.11 Push notifications (Notify Me)

Visitors can tap the bell (**Notify Me**) in the main menu to allow browser notifications about calendar updates on supported browsers. In Brave, the visitor must turn on Google push messaging. The CMS has no screen for writing or sending a push message, and **Schedule Board changes do not send push notifications** in this release. Use **Finished** (email) to tell families about schedule changes. Contact the site host if you need push alerts.

6.12 Social and top links

- **Social icons**: Menu → **Social Media** → **Account links**. Enter the Facebook, X, Instagram, YouTube and TikTok page addresses and click **Save social links**. A blank address shows a faded placeholder icon.
- The same screen connects the band's Facebook Page and Instagram (**Connect Facebook**, **Connect Instagram**, **Refresh status**, **Disconnect**), lets you compose a Facebook post (now or scheduled), and turns on **Auto-post new gallery photos**.
- **Top links**: Menu → **Site Settings** → **Top utility links**. Each link has a label, an address and Same tab/New tab. Use the arrows to reorder, **×** to remove and **Add** for a new link (six at most). Click **Save links**.

> **SITE POLICY**
> Social Media and Site Settings require the Site settings permission, which is kept with Super Admins.

6.13 Site settings, error pages and maintenance mode

Menu → **Admin** → **Site Settings** (titled "Home, title, logo, footer, and top links") holds Site title, Hero title, Hero subtitle, Footer note and Logo URL, the **Error pages** card, the **Maintenance mode** and **Show band dues on Boosters** switches, **Save site settings**, and **Upload new logo**. Do not replace the logo (Section 7).

The **Error pages** card lets Super Admins change copy for branded public errors: **404 Page Not Found**, **403 Access Denied**, **401 Sign-In Needed**, **500 Server Error**, **503 Back Shortly**, and **429 Too Many Requests**. Empty fields use the built-in band defaults. 500, 503 and 429 stay on a lite page so they never query the database. Inactive public pages (except Coming Soon placeholders) show the branded 404.

1. Only Trevor / Super Admins see the **Maintenance mode** switch. The Site settings permission cannot turn it on or off. Flip the switch to save immediately — each flip writes one Security log row (`change.maintenance`).
2. Visitors, and every account that is not a Super Admin, now see the maintenance page ("We'll be right back."), served as a 503. Super Admins can still browse the site, with a banner reading "Maintenance mode is on. Super Admin preview..." and a **Back to CMS** link.
3. To go live again, flip the switch off. The CMS confirms: "The public site is live again."

6.14 Other tools

Tool	Who	Use
Staff Email	Everyone	Email other CMS users with formatting and attachments (up to 5 files, 4 MB each, 10 MB total). Replies go to the sender's login email.
Meeting Minutes	View: everyone · Add/edit: **Meeting Minutes (create/edit, 48h)** · Delete: Super Admin	Booster minutes by date. Use **Add Minutes** (template) or **Upload .docx**, and **Print / Save PDF**. A secretary can edit for **48 hours from creation** (the screen shows "Editable until ... (48 hours from creation)"). After that only a Super Admin can edit. Minutes are never public.
Badge Creator	Super Admin, President, VP	Printable name badges for officers and committee members.
Donations ledger	Treasurer, President	Income, expense and in-kind records, with **Download Excel**. The menu label is **Donations ledger**.
Checkout	Treasurer, President, VP	Charge a card through Square ($1.00 minimum). Card details stay with Square.
Security Log	Super Admin only	Read-only record of logins and CMS changes. Month/year (Eastern Time), 25 entries per page, search, and a PDF of the selected month. It cannot be edited or deleted.

6.15 Security log (Super Admin)

Menu → **Security Log**. Only Super Admins can open it. The log is append-only: no one can edit or delete a row, including Super Admins. D1 triggers abort any UPDATE or DELETE.

- The screen opens on the **current month in Eastern Time**, with a month and year selector. Change those to look at an earlier month.
- It shows **25 entries per page**, newest first. Use « ‹ Page › » to move through the month.

- Search by **user**, **action** (dropdown of known actions such as login, change.pages, mail.send), an optional **date range**, and free text. Free-text search looks at the decrypted summary, path, and details of the rows already loaded on that page. It does not search encrypted ciphertext in the database.
- **Download month PDF** exports the selected month (and any user/action/date filters). Keep that PDF with your records.
- Visual editor **Save draft**, **Publish**, and **Restore** appear as **change.pages**, with the page name and kind (draft, publish, or restore) in the summary. Opening a visual editor page adds **page.edit.open**. Fundraiser card work uses `fundraiser.card.create`, `.edit`, `.reorder`, `.approve`, `.reject`, `.restore`, `.hide`, `.delete`, and the daily calendar job uses `fundraiser.draft.auto`.
- Failed CMS logins and permission denials appear as **login.failed**, **login.locked**, **access.denied**, or **access.unauthenticated**. The row records who (if signed in), a session hash, IP, country, browser, method, path (query strings stripped), and the permission that was required. Repeat hits from the same IP, path, and action within 10 minutes collapse into one append-only summary row so the Free-plan D1 write budget stays small.
- Every sealed row includes parsed device info (OS, browser, device type) from the User-Agent and `Sec-CH-UA` hints. The login page (CMS only — not the public site) also records screen size, pixel ratio, viewport, time zone, language, and platform on the login success or failure row. Later rows in that session point at the same session hash instead of repeating those client fields. The CMS asks browsers for client hints only on `/admin` responses.
- Rows cannot be edited or deleted through the website. Database triggers abort any UPDATE or DELETE on the log table. Each row still shows its own integrity flag and HMAC fingerprint. **Verify integrity** walks the whole log and shows a green **INTACT** box (Chain intact) or the break count, a grey **Previous log (closed)** section when an older generation exists, and any pre-link rows with what is guaranteed: they cannot be edited through the website, and the database blocks changes. If someone with direct database access went around that, this check would show a break. This check cannot prove they were unchanged before linking began. Technical terms stay under **Technical details**.
- If an audit write fails, the Worker logs it and the Security Log shows a warning such as **N audit writes failed since <time>**.
- **Verify integrity** checks the SHA-256 hash chain for the selected date range without needing to edit anything. **Download CSV** and **Download JSON** include a signed chain-head hash for handing records to the school or police.
- **Start a new log generation** is Super Admin only and needs Trevor's authorization. It does not change or delete old rows. It writes a `log.genesis` row (reason, date, who started it, previous chain head, previous row count, and that the site has been logged since the original build) and continues the hash chain under a new key id (`k2`, `k3`, …).

7 Do's and don'ts

Do	Don't
Keep the site's colors. Use navy, blue, red, silver and gold (Section 9 has the exact values) for any colored text.	Pick random colors with the Color picker or restyle whole pages.
Keep **both logos**: the East Forsyth HS eagle and the Blue Regiment mark.	Replace, stretch or remove either logo, or upload a different logo in Site Settings.
Use **real band photos** of our students, staff and events, with permission.	Use stock photos, AI-generated images or pictures from other schools.
Keep images **reasonably sized**: under about 1 MB and around 1600–2000 pixels on the long side. Every photo is stored in the site database.	Upload huge originals, screenshots of text, or many near-duplicates.
Write helpful **alt text** for every photo.	Leave alt text as a file name such as "IMG_2041".
Give every person their **own account** with only the permissions they need.	**Share logins** or passwords. The Security Log records who changed what.
Save a **draft** in the visual editor and check phone widths before you publish. Edit pages and Fundraiser cards on a **computer or tablet**.	Experiment on the live page, or try to edit those screens on a phone.
Approve Fundraiser cards before they appear on the public Fundraising page.	Expect a rejected calendar event to come back as a draft unless its date changed.
Turn off **Notify email list** for typo fixes.	Email subscribers for every small change, or press **Finished** repeatedly.
Hide a page with the **Active** box when it isn't ready.	Delete photos used inside page text.
Log out on shared or school computers.	Leave the CMS open on a public device.

8 Troubleshooting and contacts

Problem	Try this
Can’t log in	Use your full email address as the username. Passwords are case-sensitive. Check whether 24 hours have passed. Ask a Super Admin to reset your password or re-check **Active**.
A menu item or Dashboard card is missing	Your account lacks that permission. Ask a Super Admin.
My change isn’t showing	Wait a minute, then hard-refresh (Ctrl+Shift+R on Windows, Cmd+Shift+R on Mac). Make sure you clicked Save, or Publish for Join.
A page shows “Coming soon”	The page is inactive. Check **Active / visible on the public site** in Page settings.
A page won’t change in ⚙ Page settings	That is expected. Page settings save title, address, menu, and Active. Click the page name under Pages to edit the text in the visual editor. Home still uses the older editor.
“Please edit pages on a computer or tablet.”	Open the visual editor or Fundraiser cards on a computer or tablet. Phones are too small for those editors.
Meeting minutes will not save	The 48-hour edit window from creation has closed. Ask a Super Admin to edit, or add a new minutes record.
A fundraiser card is missing on the public page	It must be **Approve**d. Drafts, hidden and rejected cards stay off the public site. Check **Fundraising → Fundraiser cards**.
“Add some page content before saving.”	The Join page is empty. Add a section or restore a version from History.
Photo won’t upload	Use JPG, PNG, WEBP or GIF, add alt text, and try a smaller file.
“This image is still used as …” on delete	Replace the photo on that staff member, booster member, sponsor or logo first.
The red IMPORTANT banner won’t go away	It ends after the event date. To remove it sooner, change the event’s **What** or delete the event.
A contact topic is missing on the public form	The topic must be Active and have at least one recipient.
Form submission shows “Not emailed”	The PDF is still under Recent submissions (Download PDF). Tell the site host that email delivery failed.
The whole site shows the maintenance page	A Super Admin turned on Maintenance mode. Turn it off in Site Settings.
Website Guide card is missing	Only Super Admins can open this guide.
The site is down, shows an error, or is very slow	Contact the site host (below). Don’t keep re-saving.

Who to contact

For	Contact
Content questions, new editor accounts, permissions	The band's Super Admin / content administrator
Site down or errors, login problems for a Super Admin, the domain, email or payment problems, layout or design changes, new features, anything that needs code	**Trevor Olsen**, site host Phone: _____ Email: _____

When you report a problem, include the page address, what you clicked, the exact message you saw, the time it happened, and a screenshot if you can.

9 Brand reference

These are the site's colors, from its stylesheet (`styles.css`). Use them when you color text in the editors.

Navy	Blue	Red	Silver	Gold
#002142	#014990	#E71321	#C0BFC4	#FDD703
`--navy`	`--navy-2`	`--red`	`--silver`	`--gold`

Logos: `/assets/efhs-logo.png` (East Forsyth High School eagle) and `/assets/efhs-blue-regiment-mark.png` (round Blue Regiment mark). Both appear in the header and on Coming Soon pages and must stay as provided.

A Appendix · For the site host

This short section is for Trevor Olsen as site host. Content administrators can skip it. It contains no passwords, keys or tokens. Those live only in Cloudflare and with the host.

A.1 Hosting overview

Piece	Details
Domain	efhsband.org on Cloudflare. Route `efhsband.org/*` goes to Worker `efhsband-live`. HTTP and `www.efhsband.org` redirect to the HTTPS apex (`https://efhsband.org`).
HSTS	Cloudflare SSL/TLS → Edge Certificates. `Strict-Transport-Security: max-age=31536000` (one year). **includeSubDomains** off. **preload** off. Do not change those two flags.
Worker	`efhsband-live` (wrangler.toml), a single Cloudflare Worker that serves pages, the CMS, the API and the static assets in `worker/public`. Plan: **Workers Free**.
Database	Cloudflare D1 `efhsband-db` (binding `DB`). It holds all content, users, settings, forms and photos. Photos are stored inside the database (about 57 MB in total in October 2026, mostly photos). No R2 or KV is used.
Test copy	Worker `efhsband-dev` with its own D1 `efhsband-dev-db` (wrangler.dev.toml), on its workers.dev address. It never uses the production name or database.
Code	GitHub `nitrofireinc-pixel/react-router-starter-template`.
Outside services	Resend (email), Square (payments), Zernio (Facebook/Instagram). Their credentials are Cloudflare secrets, never committed.

A.2 Deploy process

1. Start from a **fresh clone** of the release branch, then run `npm ci` (Wrangler is pinned in package.json).
2. Run the tests: `npm run test:worker` and `npm run test:cms-guide-pdf`.
3. **Test copy first:** `npm run check:worker-assets && npm run sync:worker-assets && npm run check:worker-public && npx wrangler deploy -c wrangler.dev.toml`. Then check efhsband-dev: home, calendar, /admin login and the changed screens.
4. **Safe schema deploy:** turn **maintenance mode on**, deploy the new Worker, and let `initDb` self-migrate on the first request. Keep maintenance on until the new Worker is the only isolate serving writes: an old Worker isolate that writes a Security log row after the first new linked row will abort, and that entry is lost. Do **not** run `migrations/*.sql` by hand on D1. Hand-running an older file that already added a column can roll back the whole file; a later file can then stamp `schema_version` without the columns the Worker needs. Column ALTERs are Worker-only (`pragma_table_info`). Never UPDATE or DELETE `admin_audit_log` rows.
5. **Production:** `npm run deploy:worker`. This checks wrangler.toml, syncs the assets, confirms every published file is git-tracked, then runs `wrangler deploy` to efhsband-live.
6. Verify the live site, logged out and logged in, with a hard refresh. To roll back: `wrangler rollback <version>`, using the version ID from `wrangler deployments list`. The Cloudflare dashboard Deployments list also works.
7. **Security-log deploys:** any deploy that touches the Security log, its D1 triggers, encryption, or schema needs Trevor's authorization code before production. Do not write that code in this guide, in git, or in chat. Record only that authorization was given.

8. The Fundraiser cards calendar sync cron is `20 11 * * *` (7:20 AM Eastern). Keep that trigger in both wrangler.toml and wrangler.dev.toml when the Worker is deployed.

> **IMPORTANT**
> Never use `npm run deploy:pages` for the public domain, never rename the Worker away from `efhsband-live`, and never point `[assets] directory` at `./assets`.

A.3 Free-plan limits and how the site stays inside them

Limit (Workers Free)	Amount	How the site stays within it
Worker requests	100,000 / day	CSS, JS, images and fonts are served by the static-assets layer without running the Worker. Only pages, /admin, /api, /uploads and the guide downloads run the Worker (`run_worker_first`). Logged-out visitors skip the session check.
CPU time	10 ms / request	Light rendering. Public data is cached in memory and the Cache API for about 60 seconds.
D1 rows read	5 million / day	Indexes on the busy queries, the 60-second public cache, the menu query reading no page bodies, and photo bytes cached in the browser for a day.
D1 rows written	100,000 / day	Public page views never write. Only CMS saves and form posts do.
D1 queries per request	50	A tested budget of 40 or fewer queries per request (tests/test_d1_query_budget.mjs).
D1 database size	500 MB (5 GB account)	About 57 MB used. Uploads are capped at about 1.9 MB each, so watch growth from photos.

Daily D1 limits reset at midnight UTC (8 PM Eastern during daylight time). Since September 1, 2026, Cloudflare blocks D1 queries for the rest of the day when an account goes over, so pages and CMS screens that need the database would stop working until the reset. Check usage in the Cloudflare dashboard (Workers & Pages → D1) if anything looks wrong.

A.4 Backups

- **Built in:** D1 Time Travel allows point-in-time restore of `efhsband-db` to any minute in the last **7 days** on the Free plan (`npx wrangler d1 time-travel restore efhsband-db --timestamp=…`).
- **Code:** GitHub holds the full history. Any commit can be redeployed.
- **No scheduled export job exists** in the repository. Recommended: a monthly `npx wrangler d1 export efhsband-db --remote --output efhsband-db-YYYY-MM-DD.sql` kept off-site in encrypted storage. The export includes photos, personal data and password hashes, so treat it as confidential.

A.6 Security log encryption key and “new log” procedure

The Security Log encrypts each new row’s details (IP, user agent, content excerpts, diffs, file hashes) with AES-256-GCM. The key is a Cloudflare Worker secret named `AUDIT_LOG_KEY` for generation `k1`, then `AUDIT_LOG_KEY_K2`, `AUDIT_LOG_KEY_K3`, and so on. Trevor does not hold or see the key. It must never exist outside Cloudflare’s secret store: not in git, wrangler.toml, chat, screenshots, or a file.

First install (deploy step only): generate and store the secret in one pipe so it is never assigned to a variable or printed. DEV uses a different random value than production. Do not set the production secret until the production deploy step.

```
openssl rand -base64 32 | wrangler secret put AUDIT_LOG_KEY --name efhsband-dev
wrangler secret list --name efhsband-dev
# Production, only at the prod deploy step:
openssl rand -base64 32 | wrangler secret put AUDIT_LOG_KEY --name efhsband-live
wrangler secret list --name efhsband-live
```

After the pipe, report only that `wrangler secret list` shows `AUDIT_LOG_KEY`. Do not read the secret back.

If the key is lost, or a new log must start (Trevor's authorization required):

1. Do not overwrite `AUDIT_LOG_KEY`. Old rows stay encrypted with the original secret and must remain readable.
2. An authorized deploy agent pipes a fresh CSPRNG value into the next named secret, for example `AUDIT_LOG_KEY_K2`, using the same one-line openssl | wrangler pattern. Never print it.
3. A Super Admin opens Security Log → Start a new log generation, enters the reason, types that Trevor authorized it, and confirms `START NEW LOG`.
4. The Worker writes `log.genesis` (reason, UTC date, actor, previous chain-head hash, previous row count, note that the site has been logged since the original build) and continues the hash chain. Every new row stores its key id so generations stay distinct. Existing rows are not updated or re-encrypted.

Limits: the Cloudflare account owner can still decrypt because they control the Worker secrets and D1. Encryption protects privacy from anyone browsing raw D1. The hash chain plus a scheduled daily export of the chain head to an outside location is the stronger tamper-evidence plan; that daily export is not built yet.

A.5 Where this guide lives

This guide is committed as `assets/downloads/EFHS-Band-Website-CMS-Guide-Super-Admin.pdf`, with its HTML source next to it. The Worker serves both only to logged-in Super Admins (`/api/admin/website-guide.pdf` and the `/assets/downloads/` paths). Anyone else is sent to login or gets a 403. To update the guide, replace both files, run `npm run build:cms-guide-pdf` and the guide test, commit, and deploy as in A.2.

End of guide · East Forsyth Blue Regiment Band · Website & CMS Guide · Version 2.2 · October 2026
